IMPORTANT INFORMATION ABOUT CORK FLOORS

Cork is a natural product containing natural characteristics such as color, tone, and graining. Some variation in color is to be expected in a natural cork floor. Please note that the display sample may not always be a true representation of the final cork floor product. For this reason, new and/or replacement material may not exactly match display samples and/or existing flooring.

A natural cork floor is subject to color changes with the exposure to normal sunlight. These color changes should be expected and are a desired attribute in the uniqueness of cork floors.
